Sprint Release Highlights

Release Date: Dec. 23, 2014

OrderSmart®

CHANGES OVERVIEW

OrderSmart – Generic

For all users improved loading performance of the workqueues.

For collection tech user, fixed issue in showing the signature pending orders list and count.

For all users in IE8 browser, fixed issue in displaying orders when the workqueue has default sort and user does custom search or on navigating back to orders.

OrderSmart – Workqueues

For facility group users and facility users, For cases without orders, in the right context menu added "Create Order" link.

- Ability to create/place an order, when the user right clicks on a schedule to associate order, if no order found or when there are orders that can be associated.
- The page navigates to the place order screen when the user clicks on the "Create order" link in the right context menu.

OrderSmart – Authorization tab

For facility   group users and facility users for authorization responses added "Unlink" on used response documents only if the authorization details are latest.
