Re: UPDATE to EDI Claim Edits Effective December 30, 2015

Changes were made to some of the edits released into production last week, previously communicated on Dec. 17, 2015. Please make system updates as needed to the following:

1. Two codes were reported to be included in the December release, yet *were retracted prior to the release*:
 - H25658 - At least three External Cause of Injury codes must be present to fully describe the injury
 - H46541 - Present on Admission indicator for inpatient claims is required
2. One code was not reported, yet *added prior to the release*:
 - H25670 - Duplicate Diagnosis Pointers are not allowed
3. One code was released into production, but *will be retracted on 1/13/16*:
 - H46546 - Supervising Provider (2310D) cannot be the same as the Rendering Provider at the claim level (2310B) or the service line level (2420D/2420A)

Thank you,

UnitedHealthcare
